Why Dry Steam?

Dry steam cleaning is a cost effective and time saving cleaning method removing up to 99.9% bacteria and pathogens. All departments can benefit from the improved results provided by the use of dry steam, from housekeeping to catering, ensuring that infection control and visual cleanliness is always at its best for your residents and staff.

A Tool For Every Cleaning Job

Steam Australia's quality dry steam machines have a vast array of attachments to cover endless cleaning applications. Choose from a preselected hospitality accessory package or customize your accessories to suit your needs. Make tricky and labour intensive cleaning jobs easier in your business, with our powerful dry steam sanitising machines. For example, sanitising curtains, bathrooms, bedding, upholstery and communal areas.

Built To Last

Steam Australia's quality commercial steam cleaners are manufactured and designed in Italy and are built to last.

Our accessories are constructed with a makeup of 50% Fibreglass Reinforced Polymer (FRP), categorically top in their field. FRP is often used in aerospace, marine & construction industries, so you can guarantee these accessories have high durability.

Ecological Results

Utilizing dry steam presents significant cost savings and environmental benefits. Including:

Environment and sustainability

- Uses significantly less water and minimal to no chemicals;
- Reduces chemical waste;
- Creates a clean, dry and sanitized environment; and
- Quickly kills germs, bacteria, dust mites, bed bugs and other parasites.

Economical

- Reduces chemical usage by up to 100%;
- Reduces water usage up to 90%;
- Reduces the cost of water and waste disposal;
- Enables faster cleaning times, allowing staff to clean more areas; and
- Improves facility cleanliness.

Results Without Compromise

Achieve your environmental targets without compromising on efficiency or results!

Suitable for every situation

Using a maximum of 5 litres of water per hour, dry steam will deep clean far more effectively than traditional methods. Steam penetrates deep into the surface, easily removing dirt, grease and grime from the otherwise unreachable areas.

As the steam is hitting the surface at well over 100°C, it not only leaves the surfaces clean, it sanitizes and deodorizes without the use of chemicals. Dry steam also leaves minimal water residue behind, allowing you to either wipe away with microfibre or switch on the vacuum function leaving the surface clean, dry and ready for use.

Case Studies and White Papers

Information on hospital wide roll out of steam and microfibre has become much more available in recent years. Ask us for more information as to how this new technology and cleaning methods can help improve your:

- Environment and sustainability goals
- Workplace health and safety
- Staff moral
- Economical outcomes

Patient Rooms

- Clean and sanitise simple and complex surfaces
- Effective against multi-drug resistant organisms
- Clean and decontaminate curtains in place
- Removes stains from bed linen, carpets and carpeting

Choosing a suitable machine for you

Steam Only

Steam only machines are exactly that – steam only. They have one function and that is to provide high quality dry steam to complete the task easily. Because they have one main function the benefits include:

- More compact and light weight than steam and vacuum machines
- Typically can supply more quality steam for longer periods of time
- Lower investment cost than their steam and vacuum counterparts
- “Plug & Play” functionality – easy and intuitive to use for new and experienced users

Steam and Vacuum

Steam and vacuum machines allow the use of a wet vacuum in conjunction with the steam machine in one compact unit. Steam and vacuum units provide the following benefits:

- Leave surfaces dry – instantly
- Provide a deeper clean to soft surfaces and upholstery
- Features can be used individually or combined with the press of a button
- Accessories for any task – users are never left wishing they had a certain feature to provide impeccable results
- Our commercial steam and vacuum models also come with an added detergent injection function for the more demanding jobs

Recommended machines for your industry

SW9 STEAM ONLY

- » 9 bar steam pressure
- » Hot Water Injection
- » Continuous steam
- » Compact design
- » Adjustable steam

SV8D STEAM & VACUUM

- » 8 bar steam pressure
- » Detergent Injection
- » Continuous steam
- » 3 levels of steam
- » 3 levels of vacuum

Jupiter STEAM & VACUUM

- » 7.5 bar steam pressure
- » Detergent Injection
- » Continuous steam
- » HEPA vacuum filtration
- » Robust stainless construction

Pegaso STEAM & VACUUM

- » 9 bar steam pressure
- » Detergent injection
- » Continuous steam
- » HEPA vacuum filtration
- » Robust stainless construction

Testimonials

The SV8d is a very effective tool in our aged care facility. We find it great for infection control throughout the entire premises. It's easy to use and cleans in areas which are otherwise very difficult to clean in. It is also important that the surfaces are dried instantly after cleaning so this machine is perfect for us.

Clare Pile - Brian King Gardens Retirement Village

Our new SV8d is doing a great job! We're using it to clean the bathrooms, beds, spot cleaning stains and the floors throughout our whole facility including both tiles and carpet. It's fantastic for getting into tight places, sanitising surfaces and is very efficient.

Georgina Sultana - The Congregation of the Dominican Sisters of Malta

We couldn't manage without our machine. We're using it to clean the bathrooms and dining rooms and it's truly changed the way we clean. It saves time, removes grime and sanitises. The floors are dry when finished cleaning meaning the risk of people slipping is minimized.

Sharon Marsden - Goodhew Gardens Age Care

Our SV8d steam vac machine is absolutely FANTASTIC!! We've found it's particularly great for deodorising our rooms, cleaning curtains and refreshing carpets. Looking forward to seeing more fantastic results when steam cleaning furniture, windows and grout etc. Purchasing the SV8D steam vac is the BEST investment we've ever made for the facility and comfort of our residence.

Pattie Injilnji - Aged Care Centre

I work at Autumn Lodge aged facility in Armidale NSW. I use the SV8D steam cleaner daily It's the best machine for spot cleaning stains off carpets. I also use it for cleaning windows, steam cleaning curtains and cleaning bathrooms from top to bottom. Every facility should have one.

Sherrie Autumn - Lodge Aged facility

About Steam Australia

Steam Australia are the experts in steam cleaning. We've been bringing Europe's leading names in steam cleaners to the Australian market for over ten years and have built our reputation as the best place to buy a quality steam cleaner in Australia.
