Why Dry Steam?

Dry steam cleaning is a cost effective and time saving cleaning method for deep cleaning and removing >99.999% of bacteria and pathogens*. By adding dry steam cleaning to your auto-detailing services, not only can you sanitise surfaces in no time at all, you can provide a deep clean service without the need for harsh chemicals or excessive water. Dry steam cleaning leaves your surfaces cleaner and dryer for your customers.

A Tool For Every Cleaning Job

Steam Australia's quality dry steam machines have a vast array of attachments to cover endless cleaning applications. Choose from a preselected auto-detailing accessory package or customize your accessories to suit your needs. Make tricky and labour intensive cleaning jobs easier in your business, with our powerful dry steam sanitising machines. For example, upholstery, car mats, air-conditioning deodorising, rubber door seals, alloys, engine bay and

Built To Last

Steam Australia's quality commercial steam cleaners are manufactured and designed in Italy and are built to last. Our accessories are constructed with a makeup of 50% Fibreglass Reinforced Polymer (FRP), categorically top in their field. FRP is often used in aerospace, marine & construction industries, so you can guarantee these accessories have high durability.

Ecological Results

Utilising dry steam presents significant cost savings and environmental benefits. Including:

Environment and sustainability

- Uses significantly less water and minimal to no chemicals;
- Reduces water waste, and chemical waste dramatically;
- Creates a clean, dry and sanitised environment; and
- Quickly kills germs, bacteria, dust mites, mould and other parasites.

Economical

- Reduces chemical usage by up to 100%;
- Reduces water usage up to 90%;
- Reduces the cost of water and waste disposal;
- Enables faster cleaning times, allowing staff to clean more cars, bikes, trucks, boats and vans ; and
- Improves facility cleanliness.

Results Without Compromise

Achieve your environmental targets without compromising on efficiency or results!

Suitable for every situation

Auto detailing with Dry Steam will deep clean far more effectively than traditional methods. Whether you run a mobile or location based auto-detailing business we have a machine to help improve your business offerings. With temperatures produced at over 170 degrees in the boiler, dry steam has a moisture content of only 5%. This allows a deep clean below the surface and effectively lift built up dirt and grime, whilst sanitising, deodorising and leaving surfaces dry and ready for use. By switching from water based systems that saturate upholstery and carpet, to dry steam sanitising and vacuum, your customers will be able to drive away with dry seats and interior.

Reduce water waste, limit runoff and avoiding expensive wash bays. By incorporating steam sanitising and/or deep clean steam and vacuum into your service packages not only will you have a quicker result with a better clean, but no water and chemical waste. The steam vapour lifts and traps dirt ready for removal with a soft microfibre cloth. Easily remove tree sap and other difficult contaminants from paintwork in no time! Do all of this with a fraction of the water typically used.

Upholstery, Seats & Carpets

Get amazing results when cleaning upholstered seats including leathers. Just like on your skin, heat allows pores on the surface to open up, making it easy to remove built up oils and dirt. By gently massaging the steam into the leather, heat penetrates deep into the surface and lifts up any bacteria resulting a visual and microbial level clean.

- Clean seats, cushions, arm rest, head rest, steering wheel
- Sanitise and deodorise children's car seats
- Removes stains and breakdown oils and grime
- Remove chewing gum, sticky residue and wax from hard or soft surfaces
- Effective infection prevention and control for public transport or share vehicle auto-detailing

Alloys & Engine Bays

- Degrease and loosen grime after mechanical works
- Target hard to reach areas without excess water
- Break dust removal on wheel rims and alloys

Dash, Doors, Windows & Centre Console

- Kills dust mites, allergens and bacteria on high touch points such as door handles, seat belts and dashboard.
- Clean windows, mirrors, window sills, wipers, rubber seals
- Door lining, centre console, pedals

Air-conditioning Vents

- Unblock and deodorise vents
- Remove dust and dirt built up, insects and unwanted debris from within air-conditioning vents

Rubber Door Seals

Door Lining & Window Sills

Alloys

Aircon Vents

Upholstered Seats

Leathers

Carpet & Car Mats

Engine Bay

Choosing a suitable machine for you

Steam Only

Steam only machines are exactly that – steam only. They have one function and that is to provide high quality dry steam to complete the task easily. Because they have one main function the benefits include:

- More compact and light weight than steam and vacuum machines
- Typically can supply more quality steam for longer periods of time
- Lower investment cost than their steam and vacuum counterparts
- “Plug & Play” functionality – easy and intuitive to use for new and experienced users

Steam and Vacuum

Steam and vacuum machines allow the use of a wet vacuum in conjunction with the steam machine in one compact unit. Steam and vacuum units provide the following benefits:

- Leave surfaces dry
- Provide a deeper clean to soft surfaces and upholstery
- Features can be used individually or combined with the press of a button
- Accessories for any task – users are never left wishing they had a certain feature to provide impeccable results
- Our commercial steam and vacuum models also come with an added detergent injection function for the more demanding jobs

Recommended machines for your industry

SW9

STEAM & HOT WATER

- » 9 bar steam pressure
- » Hot Water Injection
- » Continuous steam
- » Chemical Free
- » Compact design
- » Adjustable steam

SV8W

STEAM, VACUUM & WATER

- » 8 bar steam pressure
- » Water Injection
- » Continuous steam
- » Chemical Free
- » 3 levels of steam
- » 3 levels of vacuum

Jupiter SD

STEAM & DETERGENT

- » 9 bar steam pressure
- » In-line detergent injection
- » Continuous steam
- » Robust stainless construction
- » 10L water and detergent tanks

OPTIONAL PROFESSIONAL UPGRADE

- » 10L HEPA vacuum filtration
- » Heavy duty steam & vacuum hose
- » Professional vacuum & mounting bracket
- » 19 piece steam & vacuum accessory kit

Pegaso SVD

STEAM, VACUUM & DETERGENT

- » 9 bar steam pressure
- » Detergent injection
- » Continuous steam
- » HEPA vacuum filtration
- » Robust stainless construction

OPTIONAL PROFESSIONAL UPGRADE

- » 9 piece steam only accessory kit
- » Lightweight steam only hose

Testimonials

"It's a fantastic machine, I've been using the steam to get into all those hard to reach areas, door jams, air vents, around the console, cupholders between the seats, and also the exterior of the car. It's actually saved me a lot of time, I don't actually have to stop what I'm doing because its one just one piece of equipment—I can do inside and outside of the car! I am saving between \$150-200 a month. The 3 or 4 chemicals that I would normally use on the interior of a car, I no longer have to use. Results have been fantastic with a cleaner and fresher look! Using the upholstery tool for seats and car mats, the big difference is that customers can drive off within a few minutes. Using steam is really quite affective when saving you a lot of time, I highly recommend using steam for all your car cleaning and detailing needs"

Steve—Jim's Cleaning & Detailing

"The SV8W machine is great for vehicle detailing. We use the water injection and finish with the steam and vacuum - works really well on seats and carpet. Really versatile machine always finding new uses for, we've done some kitchen work as well."
