Why Dry Steam?

Dry steam cleaning is a cost effective and time saving cleaning method for deep cleaning, sanitising and removing >99.999% of bacteria and pathogens*. Small or Large, all production facilities can benefit from the improved results provided by the use of dry steam. From processing to packaging, ensure that infection control and visual cleanliness is always at its best for your workers and consumers.

A Tool For Every Cleaning Job

Steam Australia's quality dry steam machines have a vast array of attachments to cover endless cleaning applications. Work with us to determine the perfectly customised accessories pack for your factory. Make tricky and labour intensive cleaning jobs easier in your business, with our powerful dry steam sanitising machines. For example, sanitising conveyors, food production equipment, sanitising floors, spills and slip hazards, and packaging and distribution process facilities.

Built To Last

Steam Australia's quality commercial steam cleaners are manufactured and designed in Italy and are built to last. Our accessories are constructed with a makeup of 50% Fibreglass Reinforced Polymer (FRP), categorically top in their field. FRP is often used in aerospace, marine & construction industries, so you can guarantee these accessories have high durability.

Ecological Results

Utilising dry steam presents significant cost savings and environmental benefits. Including:

Environment and sustainability

- Uses significantly less water and minimal to no chemicals;
- Reduces chemical waste;
- Creates a clean, dry and sanitized environment; and
- Quickly kills germs, bacteria, dust mites, bed bugs and other parasites.

Economical

- Reduces chemical usage by up to 100%;
- Reduces water usage up to 90%;
- Reduces the cost of water and waste disposal;
- Enables faster cleaning times, allowing staff to clean more areas; and
- Improves facility cleanliness.

Results Without Compromise

Achieve your environmental targets without compromising on efficiency or results!

Suitable for every situation

As more companies and customers adopt environmental policies there is an increasing pressure to maintain high standards of hygiene using environmentally sensitive cleaning procedures. Cleaning regimes and requirements vary, and most are entirely reliant on labour intensive procedures that are tedious and time-consuming. In many environments water cannot be used and cleaning is limited to wiping or spraying with sanitising solutions or alcohol.

Dry steam is an immensely powerful cleaning agent. It doesn't require chemicals and it sanitises as it works. Steam cleaning can save you time, money and raise the standards of your cleaning regime. Dry steam offers new ways of cleaning that have not been possible before. Using steam sits well with the environment, requires no chemicals and has a very low water usage also reducing effluent discharge.

Steam Australia's dry steam machines are incredibly versatile and are used anywhere from packaging to sanitation. Whether you require a custom steam tunnel to shrink wrap security seals or you need a custom belt cleaner to clean during production, Steam Australia can help select the correct steam machine for your needs.

Food & Beverage

- Clean in place belt cleaners - during or post production
- Touchless cleaning for sensitive equipment
- Low moisture cleaning
- Hand held or floor spinners - consistent results regardless of the operator
- Unique tools for all tasks
- Reduce slip hazards created during flood cleaning
- Remove all slippery residue after a spill
- Kill mould and mould spores
- De-ice cool room walls, floors and equipment
- Sanitise drains and high traffic areas

Manufacturing Equipment

- Remove stubborn grease and grime
- Deep clean difficult to reach nooks and crannies
- Clean heat stained ceilings and walls
- Window and wall cleaning
- Solutions for otherwise difficult to clean areas
- Air conditioning coils

Custom Projects

- Utilize your own engineering team or work with one of our recommended engineers
- Steam Tunnels
- Clean in place belt cleaners
- Custom tools for unique tasks
- Custom fit Chain Cleaners

Choosing a suitable machine for you

Single Phase 10amp & 15amp

Single phase machines are common place in many facilities. They are the go to machine for most cleaning tasks due to their high mobility and ease of use.

- Our industrial single phase machines combine steam and vacuum as standard allowing for immediate removal of any grime or spill.
- 10A machines can be plugged in just about anywhere—ideal for accident and spill clean ups
- 15A machines provide 50% more power. Full steam pressure no matter how big the task.

3 Phase Industrial

Steam Australia's 3 Phase industrial units are built to you're your needs. Whether you are looking for a customized belt cleaning setup or improving efficiencies through detailed lance work—our machines can handle any task.

- Large range of boiler options—from 9kw to 72kw
- Custom clean in place projects
- Conveyor or detail cleaning
- Touchless cleaning options - No scrubbing
- Connect to the water mains for zero downtime
- Customize with Vacuums, dual outlets and more!

Recommended machines for your industry

Pegaso SVD

STEAM, VACUUM & DETERGENT
10A or 15A Single Phase

- » 9 bar steam pressure
- » Digital display
- » In-line detergent injection
- » Continuous steam
- » Robust stainless construction
- » 15L HEPA in-line vacuum kit

OPTIONAL PROFESSIONAL UPGRADE

- » Lightweight steam & detergent hose
- » In-line detergent injection
- » 9 piece professional detail kit

Supervap

STEAM & DETERGENT
20A Three Phase

- » 10 bar steam pressure
- » 9kw heating elements
- » 4.5L boiler
- » Adjustable moisture output
- » Adjustable dry steam output

OPTIONAL VACUUM

Galaxy

STEAM & DETERGENT
32A Three Phase

- » 10 bar steam pressure
- » 18kw heating elements
- » 9L boiler
- » Adjustable moisture output
- » Adjustable dry steam output

OPTIONAL VACUUM
